

“Life in Space” Symposium

9am-5pm
Thursday 7 December 2023
WLT 1
La Trobe University, Bundoora

Dr Kate Kitagawa
Director
Space Education Centre
JAXA

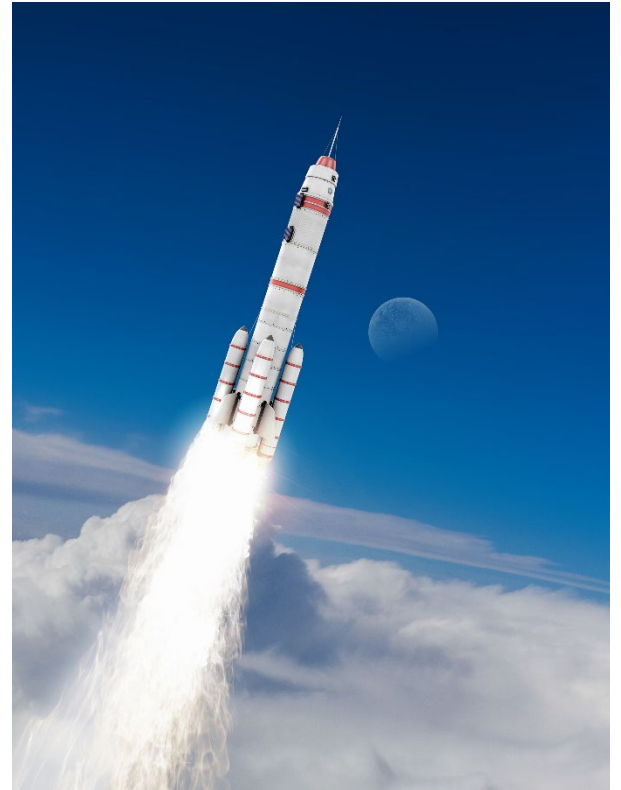

Dr Jens Hauslage
Institute of Aerospace Medicine
German Aerospace Centre DLR

Professor Masaki Fujimoto
Deputy Director-General
ISAS/JAXA

Dr Jeffrey R Davis MD
Founder & CEO
Exploring4Solutions
Former Director, Human Health
and Performance, and Chief
Medical Officer, NASA Johnson
Space Centre

As humanity moves closer to an exciting new era in space exploration – ensuring humans can live healthy lives and produce edible crops off Earth – Victorian universities and Australian industries are embracing opportunities to contribute to the skills, knowledge and infrastructure required to achieve these goals.

Hear speakers from La Trobe University, Swinburne University of Technology, RMIT University, Deakin University, Monash University, and the University of Melbourne discuss current research and education themes across humans and plants in space. Our four global speakers will share their expertise direct from their international space agencies. Industry participants provide a practical slant on accessing microgravity services.

We hope you can join us at this free event on La Trobe’s Melbourne campus at Bundoora.

Morning tea and lunch are provided. Please register your attendance for catering purposes:

Book through Eventbrite using the [link](#) or searching “Life in Space” Symposium.
